

Music & Moives

Introduction

Another music project to get you and your families discussing and listening to music in movies and films. Use this opportunity to watch a movie with everyone in your house and pay attention to the music. A task designed to see the effects music has in the films and how it can improve a movie/film. “Are you listening to the music or just hearing it?”

How to:

- Watch a movie together as a family. (*adults/parents/carers/brothers/sisters etc.*)
- Pay attention to the songs and music in the film.
- Do you or your adults/family members recognise any of the songs or music in the film?
- Did you recognise any genres of music played in the film?
- Do you or your adults/family members like the soundtrack from the film?
- Was there a song in the film which you, your adults/family members remembered the most?
- Listen to the soundtrack from the movie with your adults/family members.
- Do you or your adult have a favourite song from the film? If yes why?
- Does the music in the film help set the scene?
- Did the music in the film fit the storyline of the movie?
- Did the music help the movie? If yes how?
- Did the music in the film help to show characters emotions in different parts of the movie?
- Can you think of any songs that could work well in the film? What makes you think the song/songs would work?

Good luck.
